Application Development Lab
6th SEM
Assignment-1(html)

Create a web page as per following

1. The web page must display "e-Exam portal" as the title.

2. Home page must include a picture and paragraph describing the services the website provides.

3. Include following sections as hyperlinks that redirect to separate page describing the sections. (Home, About, e-Exam, Openforum, e-Repository, MyWall, FAQ, Contact, Login, Register)

4. Use the div tag for the placings of img, p, a and list tags.

5. Include a search bar in the page (Add no functionalities to it, for now).

6. Include a Login/Register dashboard. Add no functionalities to Login; for Register, redirect the user to a Web Form page (form details will be told).

7. The page must include footer with relevant links (deactivated).

**Don't use CSS in the code, use only HTML5 for now.

Use any Web Development IDE as per your convenience.

Visual Studio Code
